

FEATURES

- Constant gain distortion
- Smoothly adjustable distortion level
- Exponential, sine, cosine distortion types
- 9V adapter or internal 9V battery
- Input level adjustment
- Output level adjustment
- Input clipping indicator
- RGB LED distortion indicator
- Low power indicator
- Sturdy construction
- Selectable bypass
 - ▲ direct
 - ▲ buffered
 - ▲ effects bypass

- 200K samples per second
- 4 pole 40Hz to 8KHz bandpass filter

APPLICATIONS

- Guitar distortion effects
- Voice distortion effects
- Music synthesizer effects
